

# The Importance of **LED UVGI Disinfection Solution** In An Office Environment

## **ABOUT THE CLIENT**

Located in KL Eco City in Kuala Lumpur, Jason Teoh and Partners has recently adopted Ecospark's LED UVGI (UV-C) Disinfection Solution in various areas in their office.

## **CHALLENGES**

Though the management has put in place a more flexible working schedule and work-from-home arrangement since the pandemic, the office inevitably needs to be used occasionally for urgent work matters. Thus, the need for a reliable disinfection solution to create good indoor air quality and clean surfaces arose.

SOLUTION

Good indoor air quality has become an essential criteria for a safe workplace. Jason Teoh and Partners has recognized the importance of having a professional air and surface disinfection solution in place to protect their staff and customers.

LED UVGI (UV-C)

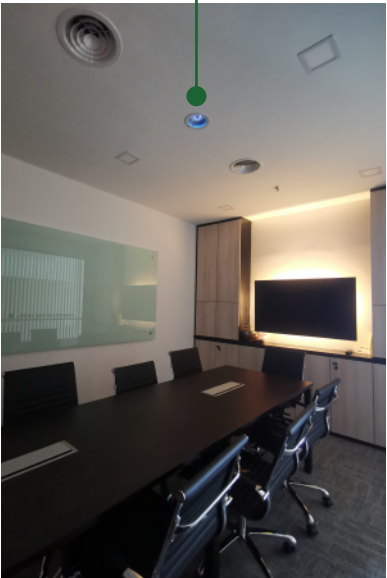

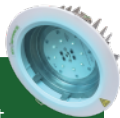

Surface Disinfection Solution

Ecospark's LED UVGI (UV-C) Surface Disinfection Units have been installed in frequently used rooms like the personal office rooms and meeting rooms. The Surface Disinfection Units are operated when the rooms are unoccupied to thoroughly sanitize the highly-touched surfaces in the rooms.

### Air Disinfection Solution

Another area which is equally important is the study area, where staff interaction happens the most. Ecospark's LED UVGI (UV-C) Air Disinfection Unit has been deployed in the study area to keep the air clean throughout the day.

## CONCLUSION

Now that the country's economic sector has reopened, most offices are gradually receiving higher volume of staff and customers. Thus, good indoor air quality has become all the more important in the operation of offices.

Ecospark's LED UVGI (UV-C) Air and Surface Disinfection Solutions act as additional layers of protection on top of the existing conventional sanitization methods used in the office.
